Sir:

In response to the Office Action dated August 9, 2000, Applicants submit the following:

AMENDMENT C

In the Claims:

Claim 1 (amended) An ink jet print cartridge structure comprising a substrate holder for mounting thereon one or more semiconductor substrates, the substrate holder having a top surface having a perimeter and containing one or more substrate locator wells, each well having a plurality of well walls and a well base, each well base including at least one ink feed slot therein, the holder including one or more chambers on an opposing side of the substrate holder from the locator wells, each chamber being in flow communication with a corresponding substrate locator well, the holder also containing side walls attached to the top surface along the perimeter thereof, wherein one or more of the side walls contain fins for convectively removing heat from the substrate holder.
